

MANIKANTA SAI SUDHEER LALAM

Electronics and Communication Engineering Student

📞 9014692314 ✉️ lalamsudheer96@gmail.com 📍 Vizag, Andhra Pradesh

SUMMARY

I am a motivated B-Tech Electronics and Communication Engineering student with a strong foundation in programming languages such as C++ and Python, along with web technologies like HTML and CSS. I am passionate about learning and applying new technologies in real-world scenarios. My problem-solving skills drive me to seek opportunities to enhance my technical and professional abilities

EXPERIENCE

Intern: Arduino & Embedded Systems

Centre of Excellence in Maritime & Shipbuilding

📅 06/2023 - 11/2023 📍 Vizag, Andhra Pradesh

A center focused on training and development in maritime and shipbuilding technologies

- Worked on Arduino Uno for developing embedded system applications
- Interfaced sensors and actuators for real-time projects
- Wrote and tested programs using Arduino IDE (C/C++)
- Designed and implemented basic electronic circuits
- Gained hands-on experience in hardware-software integration

EDUCATION

Bachelor of Technology in Electronics and Communication Engineering

Avanthi

📅 08/2023 - 05/2027 📍 Visakhapatnam, Andhra Pradesh

Diploma in Electronics and Communication Engineering

Avanthi

📅 08/2021 - 05/2024 📍 Visakhapatnam, Andhra Pradesh

KEY ACHIEVEMENTS

Automatic Railway Gate Control System

Developed an automatic railway gate system using Arduino Uno, enhancing safety by reducing manual intervention at railway crossings

PROJECTS

Automatic Railway Gate Control System (Arduino)

📅 06/2023 - 11/2023

An innovative project that automates the railway gate system to improve safety at crossings

- Developed an automatic railway gate system using Arduino Uno
- Used IR sensors to detect train arrival and departure
- Controlled gate movement using servo motor for automatic opening and closing
- Programmed and tested using Arduino IDE (C/C++)
- Designed and implemented circuit for real-time operation
- Improved safety by reducing manual intervention at railway crossings
